

PDM Workbench NX

The immersive NX Aras Innovator integration

The PDM Workbench NX is an integration of the CAD system NX to the PLM system Aras Innovator. It combines the PLM control by Aras Innovator with the CAD power of NX in a single comprehensive user interface. The PDM Workbench is also available for the CAD systems CATIA V5 and Creo.

Your challenges

Use of NX in combination with Aras Innovator as single user interface for design engineers.

Synchronization of CAD data with PLM

Considerable efforts in supplying CAD data for up- and downstream PLM processes.

Limited team collaboration

Users lack an incentive to share their data earliest possible.

Inefficiency of large design teams

Collaboration in larger CAD design teams leads to complex processes.

Quality issues

Complex collaboration scenarios lead to quality issues due to unclear processes and limited transparency.

Our solution

The designer can take full advantage of the PLM capabilities of Aras Innovator supporting collaborative product development, all within the NX environment he is familiar with.

Stay Focused: One Tool, All Functions

Comprehensive PLM functionality inside NX allows designers to stay in their primary tool.

CAD Integrated PLM Tool for Designers

Unlock the potential of Aras Innovator and NX with the built-in PDM Workbench NX.

Advanced Customization and Configuration Capabilities

Rapid and straightforward adaptation to any custom data model and customer requirements.

Highlights

- ✓ **PLM leadership**
Access to design is controlled by Aras Innovator.
- ✓ **CAD BOM and EBOM alignment**
CAD is managed in the context of PDM product structures (Engineering BOM and CAD).
- ✓ **Easy to access**
Aras Innovator can be accessed from any client computer on which the CAD software with the PDM Workbench NX is installed without need of an additional PLM client UI.
- ✓ **Seamless use of PLM**
When editing CAD design work, PDM information and functionality can be accessed directly.

Benefits

- ✓ **Continuously developed Product**
Allows always access to the latest available NX and Aras Innovator software versions.
- ✓ **Configuration and Customization**
The integration can be quickly and easily tailored to your specific needs by means of configuration and customization.
- ✓ **Support by PDM Workbench NX Product Experts**
The customer can always get support by the team of experienced PDM Workbench NX product experts. Standard Product email Support for all kinds of requests mostly within less than 48 hours.

T-Systems: Your Partner for End-2-End PLM Solutions and Services

Let's start with a Proof of Concept and see what we can achieve together.
